

This stand has been designed to move up to the 450 kV tubehead.

The height of the focal spot is adjustable between 500 mm and 2400 mm.

The X-ray beam can be oriented at any angle between the vertical and horizontal positions.

The crane can be mounted with any of the tubeheads. Each tubehead is mounted on the hydraulic appropriate clamp (not shown on picture).

Once the angle of the X-ray beam is chosen it remains the same whatever the height from the ground.

Specifications

Mechanical	
	Weight : 106 kg
